Jobsheet 05: Blade View, Web Templating(AdminLTE), Datatables

Dosen Pengampu Mata Kuliah:

M. Hasyim Ratsanjani, S.Kom., M.Kom.

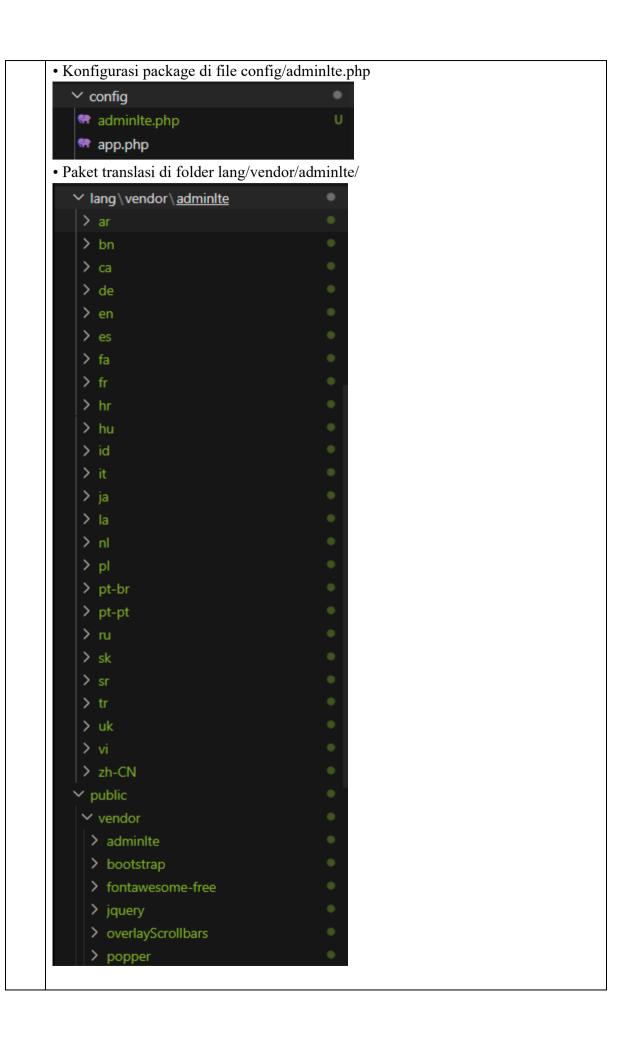

Dibuat Oleh:

Daffa Yudisa Akbar : TI-2H / 10 : 2241720008

Politeknik Negeri Malang Jurusan Teknologi Informasi D-IV Teknik Informatika 2024

A. Praktikum 1 – Integrasi Laravel dengan AdminLte3

• Dalam composer.json akan otomatis ditambahkan require untuk laravel-adminlte

```
O composerjon M X

O composerjon > ...

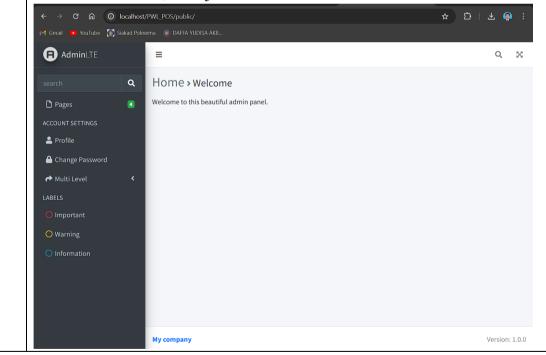

| "name": "laravel/laravel",
| "type": "project",
| "description": "The skeleton application for the Laravel framework.",
| "description": "The skeleton application for the Laravel framework.",
| "description": "The skeleton application for the Laravel framework.",
| "ilicanses": "MIT",
| "require": {
| "phn": "A:",
| "jeroennoten/laravel-adminle": "3.11",
| "laravel/framework: "10.10",
| "laravel/framework: "10.10",
| "laravel/sanctum": "3.3",
| "laravel/tinker": "1.9.1",
| "laravel/sail": "1.9.1",
| "laravel/sail": "1.18",
| "mockery/mockery": "1.4.4",
| "pestphp/pest": "2.34",

| "psr-4": {
| "psr-4": {
| "psr-4": {
| "rests\\": "tests/": "database/seeders/",
| "psr-4": {
```

3. Buat file resources/views/layout/app.blade.php.

```
map.blade.php U X
resources > views > layout > map.blade.php > map.blade.
```

4. Edit resources/views/welcome.blade.php, kemudian replace seluruh kodenya dengan kode berikut

5. Kembali ke browser, menuju ke halaman awal.

B. Praktikum 2 – Integrasi dengan DataTables

No.	Langkah Praktikum
1.	Install Laravel DataTables
	composer require laravel/ui –dev

composer require yajra/laravel-datatables:^10.0

```
PS C:\laragon\www\PWL_POS> composer require yajra/laravel-datatables:^10.0

The '10.0' constraint for 'yajra/laravel-datatables' appears too strict and will likely not match what you unit. See https://getcomposer.orp/constraints./composer.json has been updated

Running composer update yajra/laravel-datatables
Loading composer update yajra/laravel-datatables
Loading dependencies
Lock file operations: 7 installs, 0 updates, 0 removals

- Locking league/fractal (0.20.1)

- Locking yajra/laravel-datatables (v10.0.0)

- Locking yajra/laravel-datatables-buttons (v10.0.5)

- Locking yajra/laravel-datatables-fractal (v10.0.0)

- Locking yajra/laravel-datatables-fractal (v10.0.0)

- Locking yajra/laravel-datatables-fractal (v10.11.4)

Writing lock file
Installing dependencies from lock file (including require-dev)
Package operations: 7 installs, 0 updates, 0 removals

- Downloading yajra/laravel-datatables-oracle (v10.11.4)

- Downloading yajra/laravel-datatables-oracle (v10.11.4)

- Downloading yajra/laravel-datatables-oracle (v10.11.4)

- Downloading yajra/laravel-datatables-fractal (v10.0.0)

- Downloading yajra/laravel-datatables-buttons (v10.12.0)

- Downloading yajra/laravel-datatables-fractal (v10.0.0)

- Downloading yajra/laravel-datatables-fractal (v10.0.0)

- Installing yajra/laravel-datatables-ditor (v1.25.4)

- Downloading yajra/laravel-datatables-ditor (v1.25.4)

- Downloading yajra/laravel-datatables-fractal (v10.0.0)

- Installing yajra/laravel-d
```

2. Pastikan nodejs sudah terinstall, dengan perintah npm -v

```
PS C:\laragon\www\PWL_POS> npm -v
10.2.4
PS C:\laragon\www\PWL_POS>
```

3. Install Laravel DataTables Vite dan sass

npm i laravel-datatables-vite --save-dev PS C:\laragon\www\PWL_POS> npm i laravel-datatables-vite --save-dev added 33 packages, and audited 34 packages in 27s 8 packages are looking for funding run `npm fund` for details found 0 vulnerabilities npm notice npm notice New minor version of npm available! 10.2.4 -> 10.5.0 npm notice Changelog: https://github.com/npm/cli/releases/tag/v10.5.0 npm notice Run npm install -g npm@10.5.0 to update! PS C:\laragon\www\PWL_POS> npm install -D sass PS C:\laragon\www\PWL POS> npm install -D sass added 15 packages, and audited 49 packages in 9s 10 packages are looking for funding run `npm fund` for details found 0 vulnerabilities PS C:\laragon\www\PWL POS>

4. Edit file resources/js/app.js

```
resources > js > Js app.js

1 import './bootstrap';
2 import '../sass/app.scss';
3 import 'laravel-datatables-vite';
```

5. Buatlah file resources/saas/app.scss

6. Jalankan dengan npm run dev

```
PS C:\laragon\www\PWL_POS> npm run dev

> dev
> vite

VITE v5.1.6 ready in 297 ms

→ Local: http://localhost:5173/
→ Network: use --host to expose
→ press h + enter to show help

LARAVEL v10.47.0 plugin v1.0.2

→ APP_URL: http://localhost
```

7. Selanjutnya kita akan buat datatables untuk kategori, dengan perintah php artisan datatables:make Kategori

```
PS C:\laragon\www\PWL_POS> php artisan datatables:make Kategori

INFO DataTable [C:\laragon\www\PWL_POS\app\DataTables\KategoriDataTable.php] created successfully.
```

8. Kita edit KategoriDatable untuk mengatur kolom apasaja yang ingin ditampilkan Sesuaikan dengan kodeprogram berikut

```
app DataTables → MategoriDataTables;

anamespace App\DataTables;

buse App\Models\KategoriModel;
buse Illuminate\DataTables;

buse Yajra\DataTables\Hum\\suilder as QueryBuilder;
buse Yajra\DataTables\Hum\\suilder as HtmlBuilder;
buse Yajra\DataTables\Hum\\suilder as HtmlBuilder;
buse Yajra\DataTables\Html\\suilder as HtmlBuilder;
buse Yajra\DataTables\Html\\suilder as HtmlBuilder;
buse Yajra\DataTables\Html\\suilder as HtmlBuilder;
buse Yajra\DataTables\Html\\suilder\sider\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\siden\s
```

9. Ubah kategori model, sesuaikan seperti berikut

10. Ubah Kategori Controller sesuaikan dengan skrip berikut:

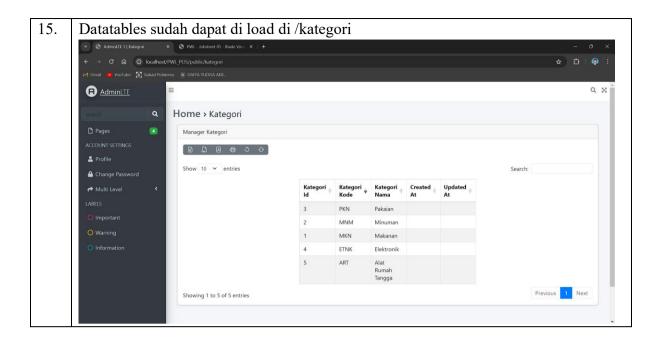

11. Buat folder kategori di dalam resources/view, kemudian buat view blade index untuk kategori resources/views/kategori/index.blade.php

12. Pastikan route untung kategori sudah tersedia

```
Route::get('/kategori', [KategoriController::class, 'index']);
```

13. Sesuaikan app layout seperti kode berikut

14. Menset ViteJs / script type defaults

C. Praktikum 3 – Membuat form kemudian menyimpan data dalam database

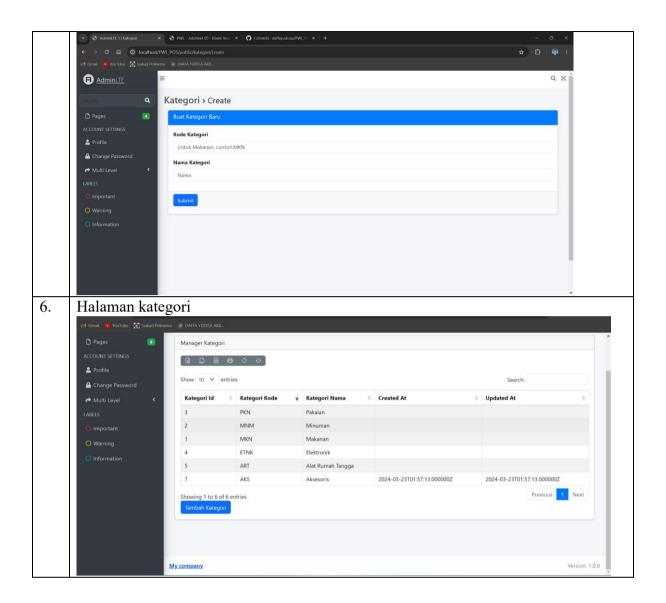

```
No
                                                       Langkah Praktikum
1.
        Menyesuaikan routing, tambahkan dua routing berikut
                   Route::get('/kategori/create', [KategoriController::class, 'create']);
                   Route::post('/kategori', [KategoriController::class, 'store']);
2.
        Tambahkan dua function berikut dalam KategoriController
                 use App\DataTables\KategoriDataTable;
use Illuminate\Http\Request;
use Illuminate\Support\Facades\DB;
                 use App\Models\KategoriModel;
                 {\it class} KategoriController extends {\it Controller}
                     public function index(KategoriDataTable $dataTable)
                         return $dataTable→render('kategori.index');
                         return view('kategori.create');
                     public function store(Request $request)
                         //dd($request→all());|
KategoriModel::create([
    'kategori_kode' ⇒ $request→kategori_kode,
    'kategori_nama' ⇒ $request→kategori_nama,
                         ]);
return redirect('/kategori');
```

Dalam folder views/kategori, buatlah file dengan nama create.blade.php

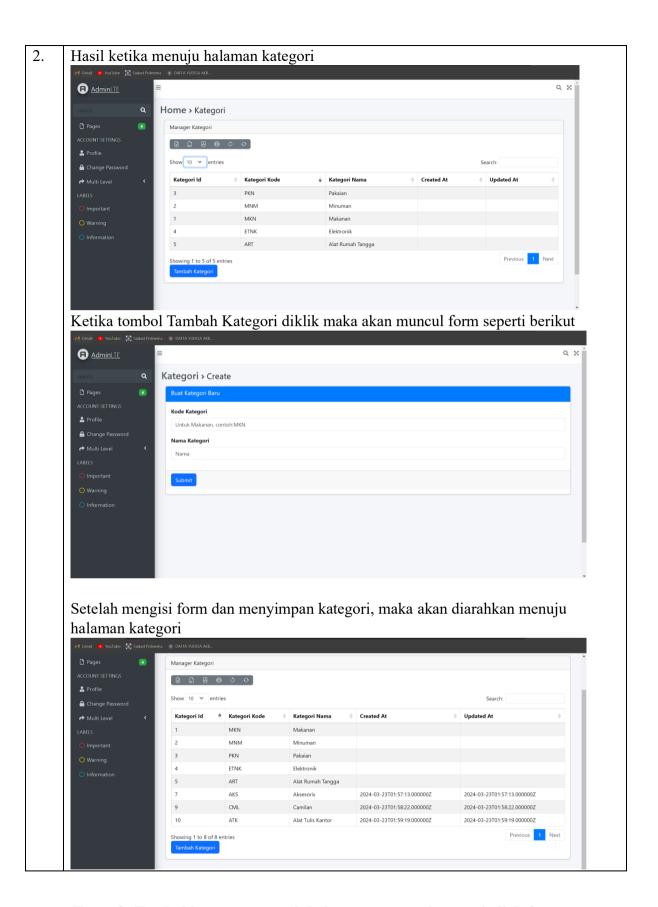

resources y memo kategori w containes discontaines discontaines

- 4. Kita lakukan pengecualian proteksi CsrfToken. Karena kita belum melakukan otentikasi
 - . Kita edit dalam file berikut:

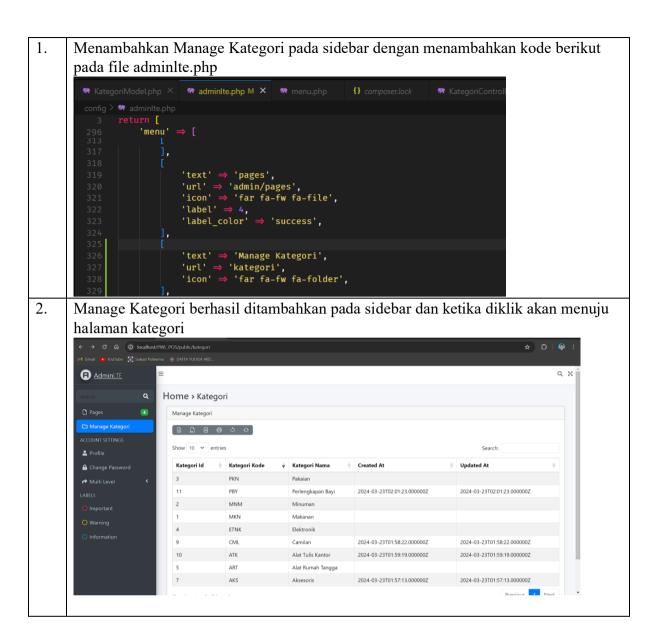

5. Akses kategori/create

• Tugas 1 : Tambahkan button Add di halam manage kategori, yang mengarah ke create kategori baru

 Tugas 2: Tambahkan menu untuk halaman manage kategori, di daftar menu navbar

Tugas 3: Tambahkan action edit di datatables dan buat halaman edit serta controllernya

```
No.

Hasil Screenshot

1. Membuat kolom action yang berisi tombol edit pada file KategoriDataTable.php dengan menambahkan kode program di bawah ini

public function dataTable(QueryBuilder $query): EloquentDataTable
{
    return (new EloquentDataTable($query))
    /* → addColumn('action', 'kategori.action') */
    →setRowId'id')
    →addcolumn('action', function($row)**
    return '<a href="kategori/edit/".$row→kategori_id." class="edit btn-primary btn-sm">Edit</a>;

}

/**
```

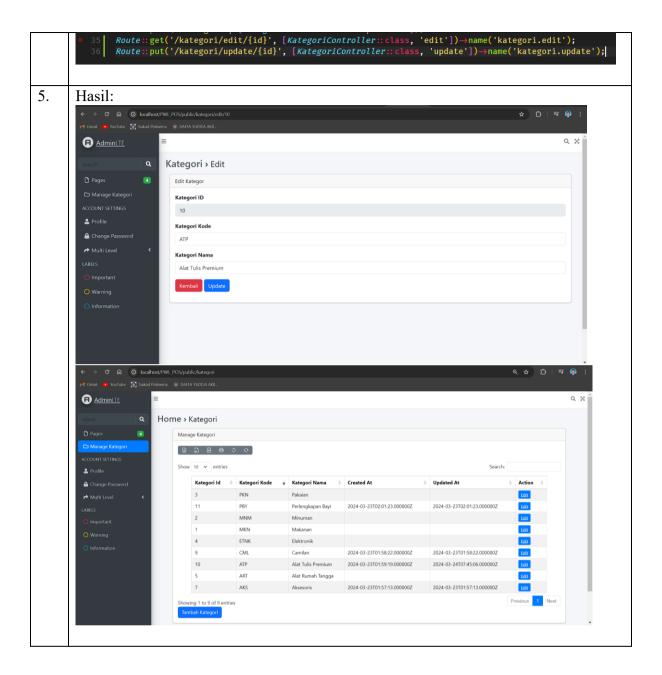

2. Menambahakan function edit dan update pada file KategoriController.php

```
public function edit($id){
    $kategori = KategoriModel::find($id);
    return view('kategori.edit', ['data' \Rightarrow $kategori]);
}

public function update(Request $request, $id){
    $kategori = KategoriModel::find($id);
    $kategori \Rightarrow kategori_kode = $request \Rightarrow kategori_kode;
    $kategori \Rightarrow kategori_nama = $request \Rightarrow kategori_nama;
    $kategori \Rightarrow save();
    return redirect('/kategori');
}
```

3. Membuat tampilan form edit kategori, dengan membuat file edit.blade.php

4. Menyiapkan route pada file web.php

• Tugas 4: Tambahkan action delete di datatables serta controllernya
